## Meeting Subject: Current eDiscovery Trends

### Issues Discussed

- Legal hold Notification
  - Significant rise in corporate legal departments implementing and planning to implement commercial off-the-shelf products for legal hold notification (LHN) management
  - Law firms managing LHN on behalf of clients
    - Value-add
    - Manage versus control
- Corporate eDiscovery: Business Process Management
  - In-source/outsource trends – successes, obstacles and frustrations
  - Level of reliance of retained counsel
    - Competitive pricing and talent
    - Law firm security
- Next Generation Technologies
  - BYOD/mobile device
    - Policy
    - Technology
  - Social media
    - Internal and external
    - Policy
    - Technology
  - Cloud
    - Migration trends
    - eDiscovery concerns

### Questions Addressed

- Which eDiscovery functions are organizations managing more effectively and efficiently in-house versus outsourcing?
- How and when should law firms provide processing and review services?
- Are organizations proactively managing data created through social media technologies?
- What policy issues should be considered for mobile devices and social media?

### About The eDJ Group

eDJ Group is a new kind of research firm – our analysts are “working analysts” that cycle between consulting engagements and research projects in order to keep a real-world perspective. eDJ’s analysts all have 10-25 years of experience in detailed eDiscovery and information governance projects. Our analysts research, analyze, and write based on a combined one hundred (100) years in the legal technology community.

For further information about the eDJ Group and their research, please contact Barry Murphy (barry@edjgroupinc.com) or Jason Velasco (jason@edjgroupinc.com).
